St Joseph's—April 2016

MORGAN SINDALL

CONSTRUCTION INFRASTRUCTURE

Enabling works have now commenced on site and these include the removal of various items of play equipment, canopies and furniture to afford access to carry out the demolition works that will give us access to carry out the main build works.

We are also currently forming new temporary car park areas for both staff and operatives as well as forming a new compound area for site office and welfare establishment and fencing off all the construction areas.

The first element of the works is a "muckshift" of approx. 1500m³ of muck. This is to allow us to commence works on the sheet piling, retaining wall, drainage and foundations.

We are currently targeting steel erection to commence 31/5/16. We have also completed the tree pruning works to assist vehicle deliveries onto site

JA Burke are a Midlands based ground works, civils and RC frame company working for the largest construction clients in the UK.

JA Burke undertake projects from £50k labour to £3m labour, plant and material schemes.

They are currently undertaking the enabling/ temporary car park works before progressing with the main build works including sheet piling, retaining wall, muckshift, drainage and foundation works. They work on many Morgan Sindall jobs with great success.

.My name is Colin Ebenezer, Morgan Sindall Site Manager (07794 094078).and I would like to take this opportunity to introduce myself to the neighbours. The purpose of the newsletters is to keep all parties up to speed with ongoing and future planned activities. I would ask that you appreciate the tight constraints within which we are operating on this site and due to the nature of construction there is always going to be an element of noise and disruption which we will endeavour to keep to a minimum.

Looking ahead

Over the next few weeks we will be:

- ◆ Completing enabling works
- ◆ Office Cabins Delivered 8/4/16
- ◆ Muckshift, Drainage and retaining wall
- ◆ Foundations
- ◆ Steelwork (Robinson's)

MJ Robinson Structures
